

A forum to foster the growing interest in scientific work at the intersection of Motor Control and Biomechanics.

SYMPOSIUM OF THE ISB TECHNICAL GROUP IN MOTOR CONTROL

MOTOR CONTROL IN BIOMECHANICS

25-29 JULY 2021

IN CONJUNCTION WITH THE XXVIII CONGRESS OF
THE INTERNATIONAL SOCIETY OF BIOMECHANICS (ISB)

DIGITAL CONGRESS

ORGANIZERS: DR. PAOLA CONTESSA (USA)

DR. WALTER HERZOG (CANADA)

DR. JIM RICHARDS (UK)

INVITED SPEAKERS

Invited talks will be followed by oral presentations.

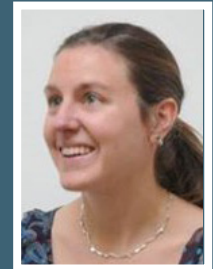

Dr. Gelsy Torres-Oviedo
The University of Pittsburg
(USA)

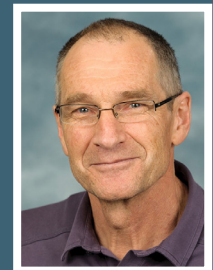

Dr. Mark L. Latash
Pennsylvania State University
(USA)

Dr. Ton van den Bogert
Cleveland State University
(USA)

Dr. Friedl De Groote
Katholieke Universiteit Leuven
(Belgium)

Dr. Walter Herzog
University of Calgary
(Canada)

Who Should Attend:

Researchers and students with an interest in Biomechanics and Motor Control should attend. Participants will have the opportunity to discover the latest developments at the intersection of these two fields and discuss with experienced investigators.

Registration and Fee:

Participation is free for all ISB congress attendees.

With the support of the International Society of Biomechanics (ISB):

Founded at Penn State University on August 30, 1973 to promote the study of all areas of biomechanics at the international level. The ISB promotes and supports international contacts amongst scientists, the dissemination of knowledge, and the activities of national organizations in the field of biomechanics.

Special Debate Session: Determining synergistic muscular force sharing

Monday 26 July 2021

1:45 - 2:45 PM CEST
